Seaweed Body Wrap

60 minutes

3,100++ THB

Seaweed may not look that great when you spot in on the beach, but this slippery, stringy sea plant contains powerful ingredients that can benefit your skin. In The Spa by Paresa we collect our own Andaman seaweed from the nearby rocks & crevices and make our very own body wraps by combining local seaweed with hot water, essential, clay and other skin care ingredients. A thick paste is formed and spread over your entire body. Your body is then wrapped in a heated towel while the paste soaks into the skin and helps to eliminate toxins from your body.

The paste is applied to the body warm, causing you to sweat while your body is eliminating impurities. These are then brought to the surface of the skin and rinsed away when the wrap is washed off. Dead skin prevents your body from absorbing moisture so while you sweat during a seaweed wrap, not only are toxins remove from the body, but dead skin is loosened as well. The seaweed itselfis full of proteins, vitamins, minerals and lipid that easily soak into the skin to add moisture.
